Please note that not all firms on this list have direct exposure to Greek government debt. However, all have expressed firm support for the IIF Financing Offer in the context of the broader set of understandings reached with the European Union. This comprehensive package of measures is considered to be vital not

only for the Greek economy but for the health of the European financial sector and the stability of the global financial system.

A number of the firms included in this list are represented on the Board of the IIF, and are expressing support here not only as the leaders of their respective firms but in their wider roles as leaders in the global financial community.
